RESEARCH INTEREST

Retrieval-Augmented Generation, NLP, Emotion Recognition, Human-Computer Interaction

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST)

M.S. in Data Science

Aug. 2020 – Jul. 2022

Advisor: Uichin Lee

Handong Global University (HGU)

B.A. Mathematics and Statistics & B.A. Management (Double-Major)

Mar. 2014 – Jul. 2020

Summa Cum Laude

EXPERIENCE

Work Experience

Machine Learning Researcher

Okestro

Sept. 2022 – Present

Academic Experience

Interactive Computing Lab

KAIST

Advisor: Uichin Lee

Aug. 2020 – Jul. 2022

Technological entrepreneurship Lab

HGU

Advisor: Doohee Chung

Aug. 2018 – Jul. 2020

Mathematics and Statistics major

HGU

Advisor: Heonjoo Kim

Aug. 2019 – Feb. 2020

Business Information Technology Practice (Teaching Assistant)

Advisor: I-Soo Joe

HGU

Mar. 2018 – Jul. 2018

Principles of Accounting (Tutoring for foreigner)

Advisor: Hyunmo Sung

HGU

Sept. 2017 – Dec. 2017

Other Experience

Mentor, Vision in Calling | HGU

Mar. 2020 – Jul. 2020

Director, Dep. of General Affairs, Student Government | HGU

Dec. 2019 – Jul. 2020

Director, Technological entrepreneurship Lab | HGU

Jul. 2019 – Feb. 2020

Executive, Residential College of International Dormitory | HGU

Jul. 2019 – Feb. 2020

Manager, Handong English Camp | HGU

Mar. 2018 – Sept. 2018

Instructor Education Certification for foreigners | HGU

Mar. 2018 – Jun. 2018

Accountant, International freshmen orientation | HGU

Mar. 2017 – Aug. 2019

English Teacher, Global Vision Christian School | GVCS)

May. 2017 – Sept. 2017

PROJECTS

Deploying chatbot service specific to cloud domain

Okestro

We are developing Chatbot specific to cloud domains using Retrieval-Augmented Generation (RAG) systems. Through this, we can primarily handle product-related inquiries from in-house customers. In particular, we are working on how to generate answers that can give trust to users in the RAG system.

June. 2023 – Present

FAQ Classification

Okestro

We present a model that uses BERT and contrastive learning to automatically classify users' inquiries. The model eliminates the need for users to have domain knowledge or for administrators to classify multiple inquiries. This can significantly improve the efficiency of the inquiry management system, reduce the workload of users and administrators and enhance the overall user experience.

Mar. 2023 – June. 2023

Log-Level Anomaly Detection

Okestro

We present FineLog, a log message-wise anomaly detection framework that enables anomaly detection for each log message in the context of a given sequence. This study shows that FineLog not only records high performance in the existing sequence unit anomaly detection, but also records high performance in log unit anomaly detection.

Mar. 2023 – June. 2023

Baseline of SWOT Classification

Okestro

We present baseline indicators by introducing BERT model, which is widely used in the natural language processing field, for the first time in SWOT analysis. Starting with this approach, the baseline indicators of this study are expected to be useful for business intelligence cloud platforms that can be easily accessed by all stakeholders through deep learning of SWOT analysis.

Sept. 2022 – Dec. 2022

Automation of Company SWOT Analysis Using Sentence BERT

Okestro

This study presented SWOT Sentence BERT as an AIaaS model that can intellectually automate company SWOT analysis. The SWOT Sentence BERT is a sentence embedding model that is learned through SWOT text data processed in the form of natural language inference task. In order to automate SWOT analysis, we applied K-Means clustering algorithm to make clusters with sentence embeddings and classified sentence embeddings based on their predicted clusters.

Sept. 2022 – Dec. 2022

Emotion Recognition (Master Thesis)

In this study, we propose a method for predicting the emotions of the speaker in the naturalistic conversation using a speaker encoder and counterpart encoder composed of CNN-LSTM deep learning networks. We used emotion-related data called K-EmoCon collected during the debate process to empirically evaluate our model. The results showed that the counterpart's speech and the physiological signals had a positive impact on predicting the speaker's emotions.

KAIST

Oct. 2021 – July. 2022

Video & Speech synthesis

We produced AI Human through voice conversion using StarGAN-VC and image synthesis using FSGAN. Through the process of analyzing various voice conversion models(CycleGAN, StarGAN-VC, StarGAN-VC2), we improved the quality of voice conversion by analyzing loss terms, number of domain classes, batch size, and iteration. In addition, the average similarity between the source video and the target video was used to facilitate video synthesis.

Deepbrain AI

Sept. 2021 – Oct. 2021

Digital Therapeutics (DTx)

We develop fundamental technologies of data-driven digital therapeutic, receptivity optimization for mobile digital therapeutic development. Furthermore, we analyze the effectiveness of digital treatments by applying causal analysis.

KAIST

Aug. 2020 – Sept. 2021

Smart Mask

We review existing types of smart masks and study what sensor data can be collected through smart masks. Also, we develop emotional and stress monitoring algorithms through smart mask sensor data.

KAIST

Jan. 2021 – July. 2022

Contact Tracing

We develop risk scoring algorithms that can be used for analysis to detect BLE contact between client devices. In addition, the need to introduce a place beacon is increasing as the number of cases infected with COVID increases just by staying in the same place without having to contact the confirmed patient directly. We also identify the coverage that place beacon can effectively send and receive signals with client devices.

KAIST

Aug. 2020 – Dec. 2020

AWARDS AND HONORS

| | |
|--|------|
| Best Paper Award (Korean Institute of Information Technology Paper Competition) | 2022 |
| President Award (Top 10 World-changing Projects) HGU | 2020 |
| Best Paper Award (National Technology Policy Paper Competition) IITP & KOTIS | 2019 |
| Best Paper Award (Korea Society for Innovation Management & Economics Paper Competition) | 2019 |
| Academic Top Scholarship for Seniors HGU | 2019 |
| Academic Excellence Scholarship for Juniors HGU | 2018 |
| Academic Excellence Scholarship for Sophomores HGU | 2017 |
| Academic Excellence Scholarship for freshmen HGU | 2016 |
